DOCTORAL RESEARCH

“Observation of Einstein-Podolsky-Rosen Entanglement on Supraquantum Structures by Induction Through Nonlinear Transuranic Crystal of Extremely Long Wavelength Pulse from Mode-Locked Source Array”

My research examined the use of ELW pulses from a mode-locked source array inducted through transuranic crystals to observe entanglement on supraquantum structures. Theoretical advancements included prediction of quantum resonance phenomena including the possibility of resonance cascades. I was motivated to conduct this doctoral research due to my passion for teleportation of matter and I believe I have laid the foundation for further experimental validation and development of practical outcomes.

WORK

EXPERIENCE

CURRENT, FROM JAN 1995 (FT)
Black Mesa Research Facility
Team Leader (Anomalous Materials)

As part of this promotion, I began conducting nuclear and subatomic research in the Anomalous Materials department. My team and I are particularly interested in dimensionality and its interaction with spacetime. The focus is on practical outcomes and applications in teleportation and communication with distal locations.

FEB 1991 – JAN 1995 (FT)
Black Mesa Research Facility
Level 3 Research Associate

P.O. Box 3985, Black Mesa Drive, NM 87545
+1 (800) 786-1410
g.freeman@bmr.f.us

EDUCATION

1986 – 1990	Doctor of Philosophy Theoretical Physics <i>Massachusetts Institute of Technology</i>
1985	Master of Science FIRST CLASS HONOURS Theoretical Physics <i>Massachusetts Institute of Technology</i>
1982 – 1984	Bachelor of Physics Department of Physics <i>The University of Washington</i>

AWARDS

1985	Faculty of Science Masters Scholarship <i>Massachusetts Institute of Technology</i>
1983	Top Achiever Award – Physics <i>The University of Washington</i>

COMPUTER SKILLS

BEGINNER	Java, MS DOS
INTERMEDIATE	Javascript, Python, HTML, CSS, Microsoft Windows Computer Hardware & Support
EXPERT	Perl, Unix, L ^A T _E X

COMMUNICATION SKILLS

CONFERENCES	Oral Presentation at the Annual MIT Theoretical Physics Conference – 1987
POSTERS	Poster at the Meeting of the American Physical Society – 1985

SKILLS

Goal Oriented

I believe in action over long-winded discussions. I listen to everyone’s viewpoints and use my judgement to immediately act based on consensus to achieve goals quickly and efficiently.

Physical Dexterity

Manual manipulation of experimental equipment and training within Black Mesa (e.g. the Haz-

This position involved transitioning from purely theoretical work to experimental applications utilising the immense resources of Black Mesa. The transition required an initial learning curve in hazard containment, health and safety procedures and operating experimental infrastructure. Manipulating valves, carts, buttons, levers, etc considerably increased my physical fitness.

JUL 1982 – DEC 1984 (PT)
WashPests Limited
Pest Control Technician

In this summer job I was tasked with helping eradicate pests from industrial areas. Work involved setting traps, spraying and physical eradication. I received praise for reaching difficult areas and my innovative use of a crowbar to assist in my work.

ard Course) have contributed to an enjoyment of working with my hands.

Passionate

I have been interested in theoretical physics such as quantum mechanics and relativity from an early age. My education and research have cemented this interest into a passion. I greatly enjoy carrying out fundamental physics research with potential practical applications.
